

Are you interested in felting recycled waste fibers (hair, fur, wool, fleece) into mats that soak up oil spills?

You shampoo because hair collects oil!

Our nonprofit will help you get started with clippings from salons, groomers and ranchers. We are supporting local manufacturing and this can be done part-time out of a small garage.

Let's mobilize to divert useful resources from landfill, build cottage industry and help keep waterways clean in your area!

Green Jobs and Business Opportunities

City storm drain lined with mat
