

Ever Have Oil Leaks or Spills?

Do your neighborhood streets, fleets or factories ever need to soak oil spills?

Support our nonprofit's green jobs initiative to help keep waterways clean.

We recycle local waste fibers (hair and fur clippings from salons and pet groomers) then felt them into mats. **You shampoo because hair collects oil!**

The U.S. Air Force, Army Corps of Engineers and University of Technology, Sydney, Australia have tested these materials and found them to be extremely efficient and ecological.

Please contact us if you would like to be a pilot study in your area!
